Arcum invites to a lunch seminar on Friday, October 6, 12.00-13.00 at Universitetsklubben, Umeå. Christer Nilsson, professor at the Department of Ecology and Environmental Sciences, Umeå University, will hold a talk on “Vindelälven-Juhtatdahka, an upcoming biosphere reserve?”.

Since we offer a light lunch we kindly ask you to register for the seminar, no later than Tuesday, October 3, by sending an e-mail to gabriella.nordin@umu.se.

Christer Nilsson, is an ecologist interested in watercourses. He writes papers and proposals, administer projects, lecture, supervise PhD students and postdoctoral fellows, and review papers and proposals of others. He is connected as an editor to the journals BioScience, Ecological Applications; Journal of Ecology; Ecosystems; Ecology & Society; and Perspectives in Plant Ecology, Evolution and Systematics. His research areas include effects of climate changes on hydrology and wetland vegetation, effects of restoration, and the impacts of hydrologic changes on biological diversity. A common feature of the research is that he analyze nature from a large-scale - in many cases global - perspective, and try to understand how different parts of the landscape are connected ecologically.
